- Collection, transportation and delivery
- Reliable vehicles and expert drivers
- Specialist on-board kit and equipment
- Help with goods and unloading
- Paperwork
- Insurance
- Legal and regulatory requirements
- Escorting and Policing and Highway notification

Crane Hire

Our fleet consists of a wide range of truck mounted and all terrain cranes ranging from 12 to 80 tonnes, however we can get larger cranes if required. We have our own Appointed Persons and Slingers, and can organise Crane and Operator only hire (CPA Hire) or a Full Contract Lift. We have recently been awarded the Safe Contractor accreditation. This means you can feel secure in the knowledge that all lifts will be done safely by qualified staff, and have confidence that our Health and Safety policy and procedures have been assessed by an independent verifier.

CPA HIRE

When you hire a crane and operator only, it is called a CPA Hire (Construction Plant Hire Association hire). The crane and operator will work to your instructions, unless they deem it unsafe. You have to plan the lift, select a suitable crane, specify the slinging and signalling arrangements, supervise the lift and be responsible for the lifting operation, (including the production of a Method Statement, Risk Assessment and Lift Plan which is to be shown and briefed to the driver). You also have to arrange suitable hired in plant insurance for up to £350,000 (which would cover you for up to an 80t crane).

CONTRACT LIFT

A Contract Lift is where we will plan the lift, select a suitable crane, specify the slinging and signalling arrangements, supervise the lift and are responsible for the lifting operation, including the production of a Method Statement, Risk Assessment and Lift Plan. We also supply full contract lift insurance which covers on hook insurance up to a value of £70,000. (Extra on hook insurance can be arranged to suit the value of the goods being lifted.)

Crane Hire - Area we cover

Warehousing and Logistics

Warehouse and office development has become an integral part of our construction business. We have built units from 1,000sqft up to 350,000sqft for customers including; DHL, McCormick Tractors, Pickfords, Howitts and JTF Wholesale. Our property portfolio includes over 2,000,000sqft of rentable space.

We have land banked all over the UK especially in the East Midlands and can design and build a unit to the customer's specification ranging from 1,000sqft to 700,000sqft.

We can also offer short term secure indoor and outdoor storage space priced upon the size of space you require for that time period. This can be specifically catered to your needs; we offer un-loading and loading using either Fork-lift trucks or Cranes depending upon the load, and can then offer transportation of the goods to their required destination.

Machinery Removals

We provide highly skilled machinery removal and installation teams who dis-mantle, manoeuvre, pack, load and transport complex machinery, factories and offices.

We have moved whole factories and then efficiently re-installed them at their new sites for many years. Walkers will handle the complete move for the customer, which have included shipping knitting machines to Italy and Sri Lanka and moving specialist drilling and cutting machines.

SPECIALIST EQUIPMENT

- Fork-lift trucks
- Versa-lift trucks and Tri-Lifters
- Equipment for skating and manoeuvring large machines through factories and workshops
- Cranes for lifting machinery
- Crane mounted trailers and HIABs
- Trucks and specialist trailers for transport of machinery to its final destination

About Us

Walker and Son Hauliers is a privately owned company established in 1954. We specialise in UK and European Haulage, Logistics, Warehousing/Property Development, Crane Hire and Machinery Removal and Installation. We are centrally based in the UK with our main depot located at Tuxford just minutes from the A1 in Nottinghamshire; we also operate a second depot at Sutton-In-Ashfield just minutes from the M1.

Our specialist in-house expertise and equipment within machinery removal and installation, crane hire, transport, logistics and storage enables us to provide a full turn-key operation from collection, storage, delivery and installation of goods. This is what makes our service quicker and cheaper for the customer.
